Was this documented in the subcontract award as different than the scheduled proposed in proposal document or the RFP requirements?

Oct 21 is the target date. The 21 day target was set when snow was not as close seasonally. We anticipate meeting the schedule.

Steve,

Well, if you are willing to take that on, it is fine for me.

What is the date for operational status?

Also, if anything causes a delay, I need to know immediately. Thanks.

Richard,

At this time, I would request that you communicate with me regarding the site schedule and operational status. If we need information from ER regarding this that can come through me unless you see a need otherwise.

I understand that many people have questions and perceive a need to know immediately. It is therefore best for all if it is coordinated through me or the lead OSC onsite who will have the most current information.

Thank you,

Steve
